SALISBURY, CONN. Friday Morning, Sept. 1, 1871.

The Unfortunate.

Mr. EDITOR. -I have thought since the establishment of your paper in our midst, that it might be well to ask the favor of space in your columns, in which to give briefly, the history of labors for the improvement of feeble minded children and youth, in this and other counties, and to speak with some particularity of the work in our state. We have in our corner of the state, an institution of great public importance, which has been quietly solving a problem of vast interest to all right thinking citizens. This problem is, that such enough to prevent the calamity. Some of an institution is a necessity in every state or large community, and that the relief tion train heard the omnious whistle, but afforded to families and friends, and the benefit conferred upon the individuals by great velocity, and the engine struck the training and care, is as great as that afforded any other unfortunate class which requires special means for instruction and the length of the car. The smoke stack elevation, or relief, as the Deaf and Dumb, the Blind, or Insane.

The function performed by this and kindred institutions, completes the circle being smashed into a thousand splinters, of our human charities. Latest, but not least, I suppose but few are aware how of the engine and tender of the rear half of recently the whip, the stocks, and the the car. Not a fragment as big as a house chains used to control the insane were window could be found. The front part thrown away, the homes of kindness, of the engine was utterly demolished, the gentleness and love substituted in their piston bent and its rods broken. The car place. The change was made about the was crowded with people, every seat being commencement of this Century. The in- occupied and many standing in the aisles. terest which attached to the experiments of In among these the engine rushed, just as Pinel, aroused attention to all kindred

rector of one of the large asylums a wild nate passengers had. Simultaneously with boy, caught in the woods subsisting upon the collision, the head cap of the boiler nuts and roots, and desired his education. This boy excited a lively interest in the were shrouded in a cloud of hissing steam minds of the thinkers and philosophers, and boiling water, which brought instant and one party pronounced him idiotic, and death to many of the wounded, and will others "simply intirely untaught." After prove fatal to others who had probably not six years of care he had not learned to been otherwise seriously injured. The value, or willingly wear his clothing, and lamps spilled their contents, and the fire efforts to educate him failed

Nearly forty years passed before any extinguished by water and steam. Alinstitution was established, designed espec- though the accommodation train was just ially to benefit the class represented by the moving when the collision took place, this wild idiot of Aveyron. In 1838 a school motion did not prevent injury to the cars for them was established in Paris. In 1842 in front of the last one. The coupling a portion of the Bicetre, one of the large between the two rear cars broke, and the hospitals for the Insane at Paris, was set platforms of all of them were jammed up apart for their instruction. In 1839 or together, the smoking car overlapping the 1840, a Swiss physician established an in- baggage car, and rods and timbers were stitution for Cretin idiots, upon the high inextricably mixed and interwoven. For-Alps. In Germany, a school was established at Berlin in 1842, and one at Leipsic in 1846. Three schools were established ting out quite speedily. Happily was it in England about 1846, at Bath, Brighton, for them they did, for the kerosene oil and at Lancastor. The first school in this lamps were upset and their contents spilled

The state of Massachusetts established traveled with great speed from one car to an experimental school in 1848, which another, until three of them were embraced resulted in founding a state institution in in their fiery folds. These subsequently 1851. The state of New York next fol- moved up the track half a dozen rods, and lowed. Then Pennsylvania, and next in left to burn until there was nothing left order Connecticut, Kentucky, Ohio, and for the fire to feed upon. Illinois. There are now more than twenty European schools for this class and eight American. Every state in this country, phia and Erie Road, collided with the Emwhich has established an institution for pire freight train goin East between seven imbeciles has cularged it, and the principle and eight o'clock last Saturday morning is fully recognized that accommodations near Westport, middle division of the Philshould be provided for all of the class who adelphia and Erie railroad. Six persons can be benefitted by training.

It is not improper in this connection jured. to say that so far as is known, the The passenger train was about an hour first systematic efforts to educate an im- late in Williamsport, and running at thirtybecile, (with the exception of those which five miles per hour. The freight train was Pinel and Itard bestowed upon the wild running eighteen miles an hour. The trains boy of Aveyron in 1801,) were made in meeting on a sharp curve were not visible our own state. In 1818 a feeble-minded to each other till they were only a few child was received at the American asylum yards apart, and their speed not being for the Deaf and Dumb at Hartford, and checked, the baggage and smoking cars of kept there until her death in 1824. Var. the mail train were telescoped, all but a ious others were received there, the nature few feet. The passengers in the two cars of their infirmity being well understood, in the rear are uninjured. Official investiand intelligent efforts made to educate gation shows that the accident was caused them, a fact of which we may well feel by the neglect of the conductor and engiproud. In my next, I will give a history neer of the mail train to obey the orders of the establishment of this school in Salis- given them not to pass Westport until the

Preponderance of Young Men in State | the engineer, who was believed to be fatally

Writing of the Iowa Penitentiary, a correspondent says:

Men of fine ability, of manly character, are easily discerned here as elsewhere. The visitor is amazed at the preponderance of young men, not unfrequently of good parentage, but more commonly of that class who have given free scope to their passions for strong drink and its associations. Its associations are necessarily and inevitably dangerous. Men of professional skill in burglary, gambling, and ill-fame, congregate at the dens of strong drink, and by their artful graces win young men (boys) to join in their hilarities, and then adroitly invite them into their little games. By this identical means forty-five young men out of sixty in the Penitentiary of Iowa assured me they had been led into the crimes for which they were incarcerated. In the Reform School are several children from nine to twelve years of age, who were instruments in the hands of expert criminals for the commission of high crimes. Their first lessons are usually learned in the schools of vice open to free access in almost every community. Their parents, if living, are either drunkards, or regardless of the consequences of drinking associations. I took an impartial record of 260 convicts in relation to their habits of wilder scenes of grief are seldom witnessed. thousand times to test its durability, as all drinking liquors. Of them, 219 had been Many of the passengers were little children, new kinds of guns are subjected to this drinking men; 109 attributed their incarce- and little hats and bonnets came ashore to test. The longest range attained by the ration to the use of liquors: 21 only had tell of the victims beneath the waves. Cap- Ames wrought iron guns is seven and three wholly of that class who are imprisoned for lighter crimes and short terms.

engineer and his wife severely injured. It THE VALLEY ROAD.-The Connecticut Valley road was formally opened-Thursday. A train of ten cars, crowded with invited ladies and gentlemen, and one platform' car, on which was Stalk's band of Springfield, left Hartford for Old Savbrook early in the forenoon, and made stoppings at all stations on the line. The excursion was of quite a festive character, winding up with the presentation of a gold watch and cane to W. R. Walkley, Esq., the

Monday evening a young gentleman, accompanied by two young ladies, one of whom was his betrothed, went on board the New York Boat, lying at the steamboat wharf, New Haven, and in some man toward the wheel of the steamboat, which he seized and held until help reached him. When he was taken from the water, his leg was found to be broken. His name was William Von Steinwehr, a son of the ner was precipated from the hurricane leg was found to be broken. His name was William Von Steinwehr, a son of the Baron Von Steinwehr.

COMMENCEMENT WERK AT MIDDLEBURY

VERMONT.-As every season brings its ac-

ward to August as our anniversary month. sion is of peculiar interest; Alumni again visit the home of their college days and recall to memory scenes of the joyous past. The exercises of Commencement week began with the Baccalaurest, on Sabbath afternoon July 6th. President Kitchell took for his text 1st Corinthians 7, 17. He said every man is a servant of God whether he wishes it or not. If willing, he obediently and cheerfully does God's bidding, and lives for that object. Unwillingly, he unconsciously does the work God assigned him, and in a certain sense, is God's serrested James Conlin, P. Kenney, P. Mor. vant. He who is particularly adapted to an, S. Stillman, J. Rhinchan, and two any station in life is called of God to that others not known, for selling spirituous position. For every sphere in life there are always some especially qualified, and better fitted for that than any other. It is every ones duty to find what his calling is and fit himself for it. In every obedient service man can serve God. If he labors cheerfully and as called of God, he helps to lift the world to a higher state. The man of humble life aids in this great work : much is done by the rank and file. BORN. In this town, Aug. 28th, a son to Walter Brasie. MARRIED.

At Nunda, N. Y., July 12, by Rev. Mr. Jones, Edward G. Coe, of Mt. Morris, formerly of West Winsted, to Minda Whitenack, of Nunda. At East Cansan, July 27 by Rev. J. Okey, John Bolton, to Miss Carrie Regler, of East Cansan.

DIED.

At West Norfolk, Aug. 22ud, Charley W., son of H. D. and Ellen Patterson, aged 2 years and 11 Edward Oles, of Colebrook, aged 29 years.

At Kent August 22nd, Reuben M. Gibbs, aged
77 years, a member of St. Luke's Lodge, No. 48 F.
and A. M.

WHEREAS.—It has pleased Almighty God to remove our brother Reuben M. Gibbs from our Lodge on earth, "to that temple not made with hands;" RESOLVED.—That as a band of Brothers we deeply mourn his loss, and will ever cherish his memory as a true and upright Mason, whose well ordered life commends his character to our emula-

tion.

RESOLVED.—That as a Lodge, we sympathize with the bereaved family in their affliction at the loss of one who was a good citizen, a devoted father, and an earnest christian.

RESOLVED.—That a copy of the foregoing resolutions be transmitted to the family of the deceased, and published in the CONN. WESTERN NEWS, LITCHFIELD ENQUIRER, and LITCHFIELD SENTINEL.
